

ALUMNI EDUCATION

A Lifetime of Learning

2008 Maclean House Lecture Series

Going Green?

The Science and Practice of Conservation and Sustainability

Select faculty members from various departments will talk about current initiatives and theories on the topics of global warming, energy conservation, and sustainability practices. Each faculty member will interpret this theme according to their own background and research interests, which will result in a variety of interesting and provocative perspectives.

Tuesday, April 8, 2008
