Van Course Instructions

1. **Forward and Reverse Serpentine:**

The driver will begin the event with the front of the van behind the first set of cones. The driver will then pass the first set of cones on the passenger side of the van then turn right to pass the next set. The driver will then turn left to pass the next set of cones. This pattern will continue until the last set of cones is passed. The driver will then pull completely into the gate and come to a complete stop. The driver will then place the van in reverse and repeat the path taken in reverse until the front of the van has passed the first set of cones in reverse. The time limit for the course is 120 seconds. Time will begin when the front of the van reaches the first cones and will end when these cones are passed in reverse.

2. **Interchange of Traffic Lanes:**

The driver will begin the event with the front of the van behind the cones of the first gate. The driver will then drive through the first gate and turn right to enter the next gate. The driver will then turn left to enter the 3rd gate and right to enter the 4th gate. The driver will stop in this gate with the front of the van within 6 inches of the blocking cones. The driver will then place the van in reverse and repeat the path taken in reverse until the front of the van has exited the first gate. The time limit for the course is 120 seconds. Time will begin when the front of the van reaches the cones of the first gate and will end when these cones are passed in reverse.

3. **Parallel Parking:** The driver will begin the event with the rear of the van lined up with the cones at the front of the parking space and about 12 inches away from them. The driver will then turn their wheel all the way to the right and then begin to back up stopping when they are 45 degrees relative to the curb. The driver will then back straight up until the nose of the vehicle will clear the cones at the front of the space (the rear bumper of the car in front). The driver will then turn the wheel all the way to the left and back up as far as they can without striking the cones to the rear. The driver will then turn the wheel all the way to the right and pull forward. The driver will then place the van in park to complete the parking maneuver. The van must end the course within 6 inches of the curbside cones and at least 6 inches from any other cones. The time limit for this course is 60 seconds. Time begins when the van begins to move and ends when the van is placed in park.
